

SALFORD TOWNSHIP  
Sewer Water Advisory Board

September 12, 2008

1. Attendance: Members – Calvin Freed, Curt Klingerman, Dave Lindner, Don Lodge, Barb Lynch, Anthony Mielich, Tom Neff, and Jim Styer.
2. Review of Minutes: The minutes of the previous meeting were reviewed and approved.
3. Sewer Line Installation: Reviewed the situation regarding the installation of the sewer line on the Allentown Road, south of the Ridge Road. The recommendation at the previous meeting was to move ahead with the installation of this part of the sewer line program prior to the repaving of the Allentown Road in March. Concern was raised about whether there was adequate time to complete the engineering work for this part of the project. It was recognized that BCM would need to accelerate the pace of their work to meet this deadline.
4. BCM Contract: The proposed contract was reviewed carefully with many suggestions for improvements. Barb Lynch will communicate the suggestions to BCM and then recommend it to the Supervisors for approval.
5. Status of recommendations to date:
  - a. Extend coverage area in the County Line Road area.
  - b. Install the sewer system to the “curb” or border of the public right-of-way, instead of to each resident’s house.
  - c. Utilize DelVal Region Financing Authority for the project.
  - d. Install the Allentown section, below Ridge Road, before the Penn DOT paving project begins in March, 2009.
  - e. Develop a “hook-up” price that provides a financial incentive to homeowners that connect within the initial time frame.
5. Next Meeting September 19, 1:00 pm, Salford Fire House.

Jim Styer
